

# The Diaper Pouch

## Koala Kare Diaper Disposal Sacks

Having a facility that is not only clean and hygienic, but one that also appears clean and hygienic is more important than ever. And nowhere is that more important than in the restroom. With the new Diaper Pouch, Koala Kare is providing building owners and facility managers a simple, yet very effective way of achieving that goal.

The Diaper Pouch (KB160) is a small cartridge that can be easily set directly into a Koala Baby Changing Station and contains 175 easy to open diaper disposal sacks. By encouraging baby changing station users to properly dispose of diapers, The Diaper Pouch reduces or eliminates unsightly used diapers and troublesome odors in the restroom.

The Diaper Pouch is compatible with Koala KB200, KB300, KB301, KB310 and KB311 baby changing stations. For more information, visit [www.koalabear.com](http://www.koalabear.com).

The Diaper Pouch is quickly and easily installed. Shown above with the KB200 Baby Changing Station
