## Replacement End Cap Instructions

P/N 387-KIT, 689-KIT, 692-KIT, 850-KIT

### Tools Required: Flat Head Screwdriver

1. If you still have one or both end caps in place, remove them by sliding a thin flat head screwdriver (or similar tool) between the head of the cap and the side of the unit. Discard the old end caps.
2. Take one of the new end caps and insert it into the cylindrical recessed area located on the side of the unit. Push it in with hand pressure until it is snug.
3. Repeat step 2 for the other side of the unit.
