

Checklist for Compliance

Restaurant owners and managers who want to ensure they are complying with the new requirements and providing the safest child seating options possible for patrons should plan to do the following:

- Work with a trusted partner to determine which chairs meet the new standard.
- Conduct an audit of your current high chair inventory to determine your need for compliant chairs.
- Ask manufacturers if they have compliant products.

Make Sure You Register!

It is important that you complete the CPSC's product registration card to improve the effectiveness and response rates for possible recalls. Product registration cards are required to ship with the product and will provide the option to register online or by mail.
